experiences.

An Invitation . . .

Program administrators who supervise staff can use the levels of competencies as a resource to assist in staff evaluation, recognition and support for ongoing learning and continuous program improvement.

For those providing training, whether in-service or formal higher education programs of youth development in 2-year and 4-year higher education institutions, this document identifies the broad range of competencies to be integrated into workshops or coursework and on-site program experiences. You can use the Core Competencies document to assist you in highlighting knowledge and skills addressed in training or youth development preparation programs to strengthen the competence of staff working with school-age children and youth.

You are invited to use this document to plan, think about, and discuss what adults need to know and be able to do to support the learning and development of school-age children and youth. Enjoy...and keep on learning!

September 2010

Nebraska's Core Competencies for School-Age and Youth **Development Professionals**

DFDICATION

Nebraska's Core Competencies for School-age and Youth Development Professionals is dedicated to all adults committed to supporting the learning and development of all children and youth by providing high quality programs, services and

You are invited and encouraged to use this document as a resource to support and enhance the work of individuals and programs involved in the education and development of children and youth. The Core Competencies for School-Age and Youth Development Professionals are designed to inform professionals and the public alike of the knowledge and skills you want to see in professionals working in licensed child care programs, public and private school before-and-after school programs, faith-based groups, summer youth camps, youth development programs, and juvenile justice programs.

If you work directly with children and youth, the Core Competencies can assist you in planning and tracking your own professional development activities as you build your portfolio of training and experience. The document can guide you in deciding what knowledge and skills you want to focus on for your next training activity or area of study.

Introduction

Core Competencies are:

what **all adults** who work with children and youth need to know, understand and be able to do to support children and youth's development, learning, and success in school and in life. Core Knowledge and Core Competencies provide a broad categorization of knowledge, skills, and attributes that apply across all roles in the school-age and youth development field.

This is the first working draft of the Nebraska School-Age and Youth Development Core Competencies. These voluntary core competencies represent the combined efforts of educators and youth development professionals from across Nebraska to define the skills, qualities, and abilities that youth development professionals need to know and be able to do to provide quality out-of-school time services for Nebraska's youth and their families.

In this working draft, you will find some guiding principles and other background information explaining why these competencies are critical and how they can be used by a variety of audiences to help develop diverse, high quality programs to meet the developmental needs of Nebraska's most important natural resource–our youth.

The bulk of this document, however, is focused on the explanation of the competencies and the qualities that professionals at various stages of their career should possess.

The Program Quality Committee of the Nebraska Community Learning Center Network, a public/private partnership supporting the development of partnerships and policies that create more high quality, sustainable out of school time programs in Nebraska, collaborated with the Nebraska Department of Education's Early Childhood Training Center to oversee this project.

This work builds on and borrows from the efforts of other states, most notably, nearby Kansas and Missouri's Core Competencies for Youth Development Professionals (2006), as well as Nebraska's own Core Competencies for Early Childhood Professionals (2008).

The Charles Stuart Mott Foundation provided organizational support for this project and helped connect our work to similar work at the national level.

The Nebraska School-Age and Youth Development Leadership Team was convened in 2009 to initiate development of core competencies for school-age and youth development professionals. The School-Age and Youth Development Leadership Team was made up of group leaders, teachers, and professionals working in a variety of school-age and youth development programs across the state. (A full listing of the School-Age and Youth Development Leadership team can be found in Appendix A.)

The Leadership Team met and agreed on a common definition of core competencies, defined guiding principles for the core competencies, designed the initial framework for the essential areas of knowledge and skills needed to work in the school-age and youth development field, and provided guidance on the number of levels needed within Nebraska's Core Competencies for School-Age and Youth Development Professionals.

A writing team worked for several months to draft the initial core knowledge competencies, and the Leadership Team reconvened to review the competencies for their usefulness, readability, and inclusiveness. The Leadership team also made recommendations for refining the draft.

Vision for Nebraska's Core Competencies

All children and youth in Nebraska have caregivers, youth development workers, and teachers who are well prepared, knowledgeable, and possess the necessary tools to help the children and youth, with whom they work, reach their full potential.

Nebraska's Core Competencies are based upon these premises:

- · Youth require a supportive environment in which to develop.
- Youth development professionals recognize that quality out-of-school time programs help support and bridge the gap between school and home. School-Age programs should also complement, not extend, the school or academic program to provide a balance in children's lives.
- Cultural diversity impacts all areas of practice. Professionals recognize that each family is unique in its structure, values, beliefs, traditions, and interactions. Professionals respect each family's worth and appreciate the richness of diversity that each family brings to the program.

Youth development is a process that all young people go through on the way to adulthood. Youth development is "...the ongoing growth process in which all youth are engaged in attempting to (1) meet their basic personal and social needs to be safe, feel cared for, be valued, be useful, and (2) to build skills and competencies that allow them to function and contribute in their daily lives." (Youth Development and Resiliency Research: Making Connection to Substance Abuse Prevention, Karen J. Pittman, Raymond O'Brien and Mary Kimball, Academy for Educational Development, February, 1993)

Youth development, then, is a combination of all of the people, places, supports, opportunities and services that young people need to be happy, healthy and successful. A young person will not be able to feel safe, cared for, valued or useful, unless their family and community provide them with supports and opportunities that they need along the way. Thus, youth development is a process in which family and community must actively participate.

practices:

Quality services— what is done for young people: Services in such areas as education, health, employment, and juvenile justice exhibit (1) relevant instruction and information, (2) challenging opportunities to express oneself, to contribute, to take on new roles, and be part of a group, and (3) supportive adults and peers who provide respect, high standards and expectations, guidance, and affirmation to young people.

From Center for Youth Development and Policy Research http://cyd.aed.org/whatis.html

What is Youth Development?

People, programs and institutions that serve youth are engaged in youth development if there is strong evidence of the following

Supports— what is done with young people: Motivational, emotional and strategic supports lead to success in life. The supports can take many different forms, but they must be affirming, respectful, and ongoing. The supports are most powerful when they are offered by a variety of people, such as parents, close relatives, community social networks, teachers, youth workers, employers, health providers, and peers who are involved in the lives of young people.

Opportunities— what is done by young people: Opportunities provide chances for young people to learn how to act in the world around them, to explore, express, belong, and influence. Opportunities give young people the chance to test ideas and behaviors and to experiment with different roles. It is important to stress that young people, just like adults, learn best through active participation and learning occurs in all types of settings and situations.

Guiding Principles for Nebraska's School-Age and Youth Development **Professionals Core Competencies**

Principles for Serving Youth and their Families

Nebraska's Core Competencies:

- Reflect and honor the diversity of individuals and ensure that programs operate to promote cultural diversity in staff, children and youth participants, and program content.
- · Clarify for families what to look for in school-age and youth development professionals.
- Encourage professionals to support multiple intelligences of youth.
- Reflect strong partnerships with schools, parents and communities.
- Help professionals appreciate each youth as an individual, while promoting successful peer interactions and relationships.
- Encourage staff to develop skills in creating fun and interactive learning within programs.
- Acknowledge the attributes necessary to work in school-age/youth development programs (integrity, trustworthiness, honesty, sense of own future, commitment to lifelong learning).
- Support staff having the knowledge and skills needed to create safe and healthy environments for both youth and adults.
- Inform policymakers on what high guality professionals need to know and the importance of staffing programs with high guality professionals.
- Are relevant to all types of youth development professionals, including 4-H, caregivers, Boy and Girl Scouts, 21st Century Learning Communities, before-and-after school teachers, Boys and Girls Clubs, YMCA and YWCA, etc.
- Reflect the need for professionals to encourage and support active citizenship in school-age children and youth.

Principles for Professional and Career Development

Nebraska's Core Competencies:

- Guide and inform professional development across all levels and types of school-age and youth development programs.
- Inform staff on which directions of continuing education, or training to pursue to advance their knowledge and skills.
- Clarify for school-age/youth development professionals all the skills and knowledge necessary to be "qualified" to work in the profession.
- Provide incentives (recognition) for staff who improve their knowledge and skills.
- Support career awareness and opportunities for defining coursework and training that can prepare people to work in school-age and youth development programs.
- Recognize that knowledge and skills shift with various positions and responsibilities in the school-age/youth development field.

Reasons why core competencies are critical to the field

 Core competencies define what professionals and volunteers in all types of youth development programs need to know and be able to do to provide quality care and education.

• Core competencies specify the needed knowledge, skills and attributes across all school-age and youth development settings.

 Core competencies support the development of qualified staff serving school-age children and youth in Nebraska.

 Core competencies help youth development and school-age programs and professionals define professional development needs.

 Core competencies define the levels of knowledge and competencies from entry level skills through advanced skills.

· Core competencies allow professionals to evaluate progress from one level to the next through a combination of training, education and self-assessment.

• Core competencies provide guidance for training and professional development of staff, college and university faculty, and curriculum developers, regarding the specific knowledge, skills, and attributes needed by school-age and youth development professionals.

• Core competencies can serve as part of the foundation for Nebraska's school-age and youth development professional development system.

Nebraska's School-Age and Youth Development Professional Core **Competencies are Voluntary**

The competencies, skills and levels described are voluntary for those working in the school-age and youth development field. Program directors, teachers, before-and-after school programs, family child care home providers, recreation camps, and youth programs are encouraged to use the document as they find helpful.

Ways Core Competencies Can Be Used:

A. Caregivers, youth development workers, teachers, and other practitioners can:

- self-evaluate their current level of knowledge.
- identify areas of training/educational needs.
- determine training/professional development that can meet those needs.
- identify potential career paths they can pursue.

Directors or administrators can:

- specify levels of training/education for individual jobs.
- develop job descriptions.
- assist staff in developing professional development plans.
- plan educational or training opportunities that will best serve the needs of the staff.
- provide guidance for a salary scale based upon levels of competency.
- appraise job performance.

C. Higher Education faculty members can:

- design courses to ensure students are able to demonstrate mastery of the competencies.
- coordinate content to facilitate transfer and articulation of college coursework.
- develop practicum experiences that meet competencies. 3

D. Trainers or training organizations can:

- identify the knowledge and skills necessary for professionals.
- evaluate audiences to determine levels of knowledge and skills.
- plan relevant training.
- build evaluation components into training to demonstrate competencies.

- 3

F. Parents can:

- 2.

G. Local, state, and national policymakers can:

- 2

3

H. Statewide professional development systems can:

- 2.
- 3
- 4

Nebraska's School-Age and Youth Development Professional Core **Competencies are Voluntary** (continued)

E. Career advisors can:

assist in developing professional goals and objectives based on needed competencies.

locate courses/training for professional growth and development.

keep professionals up to date on current credentials and requirements.

make choices in selecting programs with qualified staff.

communicate with elected officials about the importance of high guality care in school-age and youth

development programs.

develop and implement policies that support high quality programs. identify and secure adequate resources, in order to enhance professionalism and high quality programs. provide a rationale for the need for adequate resources for school-age care and youth development programs.

support the development of an integrated professional development system within Nebraska that

coordinates across systems and advances youth development.

acknowledge and promote professional growth.

provide access to competency-based training/education.

encourage compensation that is commensurate with training/education.

Some of the Key Objectives Often Found in Positive Youth Development Programs

- **Promotes Bonding:** Bonding is the emotional attachment and commitment a young person makes to social relationships in the family, peer group, school, community, or culture. Positive bonding with an adult is crucial to the development of a capacity for adaptive responses to change, and growth into a healthy and functional adult.
- Fosters Resilience: Resilience is an individual's capacity for adapting to change and stressful events in healthy and flexible ways. Resilience is a characteristic of youth who, when exposed to multiple risk factors, show successful responses to challenge, and use this learning to achieve successful outcomes.
- Promotes Competencies: The five major competencies that are the focus of positive youth development include social, emotional, cognitive, behavioral, and moral

Social Competence: The range of interpersonal skills that help youth integrate feelings, thinking, and actions in order to achieve specific social and interpersonal goals. These skills include encoding relevant social cues, accurately interpreting those social cues, generating effective solutions to interpersonal problems, realistically anticipating consequences and possible obstacles to one's actions, and translating social decisions into effective behavior.

Emotional Competence: The ability to identify and respond to feelings and emotional reactions in oneself and others. The five elements of emotional competencies include knowing one's emotions, managing emotions, motivating one-self, recognizing emotions in others, and handling relationships.

Cognitive Competence: There are two forms of cognitive competence. The first form includes the ability to develop and apply self-talk, the reading and interpretation of social cues, using steps for problem solving and decision making, understanding the perspective of others, understanding behavioral norms, a positive attitude toward life, and self awareness. The other form of cognitive competence is related to academic and intellectual achievement. It is the ability to use logic, analytic thinking, and abstract reasoning.

Behavioral Competence: The three dimensions of behavioral competencies include nonverbal communication (through facial expressions, tone of voice, style of dress, gesture or eye contact), verbal communication (making clear requests, responding effectively to criticism, expressing feelings clearly) and taking action (helping others, walking away from negative situations, participating in positive activities).

Moral Competence: The ability to assess and respond to the ethical, affective, or social justice dimensions of a situation. It is described as a respect for rules and a sense of social justice.

Fosters Self-Efficacy: Self-efficacy is the perception that one can achieve desired goals through one's own action. Fosters Belief in the Future: Belief in the future is the sense of hope and optimism about possible outcomes. Fosters Clear and Positive Identity: Clear and positive identity is the internal organization of a coherent sense of self.

Levels

Nebraska's School-Age and Youth Development Professional Core Competencies are divided into three levels of skills, which build upon each other. Professionals may be at different levels within the core knowledge areas, depending on their background experience and training.

Level

Entry Lev

Intermed

Advanced

Cor	e Knowledge Areas	What the core knowledge area includes
А.	Growth and Development	Knowledge of physical, cognitive, social and emotional development of youth.
B.	Health, Safety, and Nutrition	Ensures that professionals promote healthy eating, safe and active lifestyles, safe materials, facilities, and equipment and compliance with federal and state regulations pertaining to working with youth.
C.	Relationships	Builds respectful relationships with youth, families and staff.
D.	Learning	Creates a safe and enriching learning environment with an array of opportunities for learning.
E.	Professionalism	Demonstrates professional and ethical conduct and a lifelong commitment to learning.
F.	Administration	Implements the program in a manner that reflects research-based practices, a commitment to continuous quality improvement, sound financial practices and visionary leadership. 9

	Description
rel	Skills needed by those new to the school-age and youth development field
ate Level	Skills you would expect to see after two to three years of working in the school-age and youth development field
d Level	Reflects a breadth and depth of knowledge about research, best practices, and effective school-age and youth development services.

Core Knowledge and Competency Areas

Nebraska's School-Age and Youth Development Professional Core Competencies are divided into six areas of knowledge and skills. The six areas are:

10

A. Growth and Development Core Knowledge and Competency Area

School-age and youth development professionals understand how youth learn and develop in each of the domains: physical, social, emotional, cognitive, and creative. School-age and youth development professionals understand how youth develop and use language skills and other forms of communication. They know about various factors that influence youth development, and how their development varies from adults across skill levels, behaviors, and individual needs.

Competent school-age and youth development professionals provide inclusive programming for youth of all abilities, including those with special needs, encourage positive youth development, and take into consideration the trends and issues that affect youth.

		12

Growth and Development

B. Health, Safety, and Nutrition Core Knowledge and Competency Area

Health, Safety, and Nutrition

School-age youth development professionals establish and maintain an environment that ensures healthy development, safety, and good nutrition.

School-age youth development professionals encourage youth to be aware of personal hygiene, healthy eating, and the importance of keeping bodies moving and active, including the need for outdoor recreation.

School-age youth development programs must adhere to relevant laws and regulations; furthermore, they must consider the health, growth, and development requirements for each youth within the context of the families' cultural traditions and other special needs or unique physical and health conditions.

School-age youth development professionals should recognize that a youth's physical health, mental health, and safety are the foundations for development and learning.

Health, Safety, and Nutrition

18

C. Relationships Core Knowledge and Competency Area

School-age and youth development professionals establish supportive relationships with youth and guide them in both individual and group roles.

School-age and youth development professionals work collaboratively with families and agencies/ organizations to meet the needs of youth and to encourage the community's involvement with youth development.

School-age and youth development professionals value their unique relationships with youth, families, and communities. They also share information and resources with youth and their families that support their well-being.

School-age and youth development professionals listen in a non-judgmental way, interact in respectful ways, and exhibit concern for the well-being of others and interest in the feelings and experiences of others.

Relationships

Since 1989 the Search Institute ® has been studying assets in the lives of young people. They have developed 40 developmental assets that have been found to help young people grow up healthy, caring, and responsible. The more developmental assets a youth has, the more likely they are to avoid high risk situations.

The Search Institute has defined external assets and internal assets. External assets include the supportive relationships or activities in which youth regularly participate. Internal assets are the motivations, values, characteristics, and sense of identities that youth have developed.

Some of the External Assets are:

- * Family Support
- * Service to Others
- * Creative Activities

Some of the Internal Assets are:

- * Reading for Pleasure
- * School Engagement
- Integrity
- * Responsibility
- * Positive View of Personal Future

For more information on the 40 Developmental Assets go to http://www.search-institute.org/assets/

D. Learning Core Knowledge and Competency Area

School-age and youth development professionals establish an environment that provides learning experiences that meet each youth's needs, capabilities, and interests. School-age and youth development professionals understand that learning occurs through a combination of interactions, structures, and experiences in youth's daily lives.

School-age and youth development professionals plan and implement a variety of strategies to match youth's interests and unique approaches to learning.

School-age and youth development professionals initiate, sustain and nurture group interactions and relationships through completion of an ongoing project or activity. Professionals teach and model problem solving and conflict negotiation and guide group behavior in an age-appropriate manner.

Professionalism

F. Administration Core Knowledge and Competency Area

School-age and youth development professionals establish, implement, and evaluate school-age and youth development programs.

School-age and youth development professionals ensure that youth and families receive high quality, developmentally appropriate services. They implement sound administrative practices regarding budgeting, personnel policies, and evaluation of program quality.

School-age and youth development professionals actively consult with youth to encourage their contributions to program planning and to promote youth leadership within the program.

Administration

Glossary of Terms

Accommodations: Changes in the program materials and experiences to accommodate a child's particular needs.

Adaptive Equipment: Equipment suitable to meet requirements for conditions a person might need, either temporarily or for a significant portion of his/her life.

After school: The collective range of supervised settings for age appropriate activities and programs that school-age children, approximately ages 5-18, engage in during their out-of-schooltime.

Assets: Traits, characteristics or social supports that help young people grow up healthy, caring and responsible.

Asset Building: A term referring to skill building with youth to become resilient, make healthy choices, and develop social competence.

Cardiopulmonary Resuscitation: A procedure designed to restore normal breathing after cardiac arrest that includes a mouth-to-mouth method of respiration.

Collaboration: Working together to achieve mutually agreedupon outcomes in response to the needs and concerns of families and children.

Competency: The knowledge, skills, or attributes necessary to perform effectively.

Confidentiality: Ensuring the information on children, youth or other adults who work in the program is only available to those who need the information to do their work.

Development: The process of physical, cognitive, and social/ emotional growth that happens throughout one's lifetime.

Diversity: Recognizing and valuing differences: Includes the belief that each family has its own structure, roles, values, beliefs, and coping styles. Respect for and acceptance of this diversity is a cornerstone of high-guality, family-centered programs.

Developmentally Appropriate: Learning environment and teaching strategies that are based on theories and research about the growth and development of children and youth.

Inclusion: The practice in which all youth, with a range of abilities and disabilities, participate together and are regarded as equal members of the program.

Individual Education Plan: A plan for a youth with delayed skills or disabilities that is created by the youth, family and a team of professionals (school staff, psychologist, etc.). The purpose of the plan is to define goals for improving the student's knowledge and skills.

Internal assets: Internal assets identify those characteristics and behaviors that reflect positive internal growth and development of children and youth. These assets are about positive values and identities, social competencies, and commitment to learning.

Nutrition: A diet that provides an adequate amount of carbohydrates, fats, vitamins, proteins, minerals and water, but does not exceed the number of calories required for the body's energy needs this must take into account individual age and ethnic/cultural dietary differences.

profession.

School-Age: youth between five and ten years of age.

Youth: Young adults between eleven and eighteen years of age.

Youth development framework/approach: A positive youth development approach builds upon the youth's assets and strengths rather than focusing on his/her problems, obstacles, or risk taking behavior. A positive youth development framework includes opportunities for youth to develop self-confidence, practice leadership skills, and to improve in a variety of ways.

Positive Communication: Displaying a positive attitude, encouraging others, using a positive tone when speaking to others, demonstrating openness to hearing from others, and listening to their response.

Professional Ethics: Rules of conduct and values used in a professional setting and guidelines for responsible behavior by a

Program purpose/mission: A purpose or mission outlines the program's basic goals and/or reason for existence. The purpose or mission statement should be clear to participants, families, staff, and the community.

Nebraska Professional Development Plan for School Age and Youth Development Professionals

Name:

Current Position:

Date Professional Development Plan Developed:

1. Where would you like to see yourself in the school-age and youth development field in the next year, the next three years, and the next five years? What would you like to be doing professionally?

1 year-

3 years-

5 years-

2. What resources do you have to help you accomplish this?

3. Who do you consider to be your mentor or advisory in the school-age and youth development field?

Core Competencies Self-Assessment Summary Worksheet

Using the Nebraska Core Competencies for School Age and Youth Development Professionals indicate the specific core competencies that you regularly demonstrate and what specific core competencies that you would like to improve.

Core Knowledge Area	List specific skills you demonstrate re	gularly and specific skills you want to i	improve.
A. Child Growth and Devel- opment			
My current strengths in this core knowledge area are:			
Areas where I would like to improve my knowledge and skills are:			
My best estimate of my cur- rent level of skill in this core knowledge area is:	Level 1	Level 2	Level 3
B. Health, Safety and Nutri- tion			
My current strengths in this core knowledge area are:			
Areas where I would like to improve my knowledge and skills are:			
My best estimate of my cur- rent level of skill in this core knowledge area is:	Level 1	Level 2	Level 3

C. Relationships			
My current strengths in this core knowledge area are:			
Areas where I would like to improve my knowledge and skills are:			
My best estimate of my cur- rent level of skill in this core knowledge area is:	Level 1	Level 2	Level 3
D. Learning			
My current strengths in this core knowledge area are:			
Areas where I would like to improve my knowledge and skills are:			
My best estimate of my cur- rent level of skill in this core knowledge area is:	Level 1	Level 2	Level 3
E. Professionalism			
My current strengths in this core knowledge area are:			
Areas where I would like to improve my knowledge and skills are:			
My best estimate of my cur- rent level of skill in this core knowledge area is:	Level 1	Level 2	Level 3

F. Administration			
My current strengths in this core knowledge area are:			
Areas where I would like to improve my knowledge and skills are:			
My best estimate of my cur- rent level of skill in this core knowledge area is:	Level 1	Level 2	Level 3

The priority core competency skills I want to focus on developing are:

People who can help me develop these skills are:

Resources that I can use to develop these skills are:

Professional development opportunities that can help me develop these skills are:
