

Nebraska One-Year Opportunity Grant

END OF GRANT SUMMARY

PROJECT NAME

Crete Aquaponics System

GRANTEE

Crete Public Schools

OVERVIEW

The goal of the Crete ELO grant was to create a sustainable living program by renovating the school-owned greenhouse. The students are continuing to explore career opportunities, agriculture/gardening through an aquaponics system, and healthy eating. Although the ELO funding is only available for one year, we have been able to secure the support from our partners for at least five years. Our students are learning about growing cycles, plant nutrients, and gardening techniques by participating in fun activities that allow them to be active learners. Now that our students have a basic understanding of how the system works, they are slowly becoming responsible for the daily maintenance and operation of the greenhouse. We are starting to harvest the plants that they grew and they are learning how to incorporate those ingredients into their cooking.

SITES

Crete Intermediate School (grades 3-5)
Crete Middle School (6-8)

PARTNERS

Bungee Milling
Crete Area Medical Center
Crete Public Schools
Doane University
Grow with the Flow
Saline County Extension

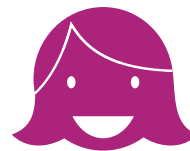

FOCUS AREAS

Career Awareness
STEM
Agriculture
Healthy Lifestyles

AMOUNT AWARDED

\$11,894

PARTICIPANTS

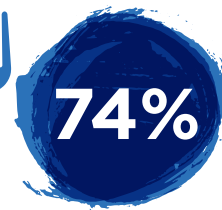

140 (Grades 3-8)

REGULAR ATTENDERS

FREE & REDUCED LUNCH

MINORITY
