

LEGO Challenges

Challenge #1

Set up your Grand Canyon wall on a sturdy surface. Take your LEGO person and place it at the bottom of the Grand Canyon. Your person has become trapped at the bottom of the canyon and must get back up to the top.

Using your LEGOs, design a way for your person to get back up to the top of the canyon. (Do not make a basic stairway)

Challenge #2

Your dog keeps jumping over your fence, and getting caught by Animal Control. You must design an escape-proof enclosure that is both humane and secure. Use your LEGOs and your imagination! Be prepared to share your design!
