Part I. General Information

Introduction

The Nebraska Student-Centered Assessment System (NSCAS) Alternate Assessment Online Tools Training Administration Manual is intended for use by Test Administrators responsible for administering the training for the Nebraska Alternate Assessment Online Tools Training (OTT).

The training introduces the online tools that will be available during testing and allows students an interactive opportunity to become familiar with the tools before testing. While the tools are the same across grades and content areas, the questions used to practice are focused on grade-bands 3 to 5, 6 to 8, and 11. The training provides students with questions to practice using the same tools, buttons, and options.

Training Instructions for All Grades

To ensure that all students will be able to understand and use the tools correctly on the day of the test, Test Administrators should review the tools, buttons, and options in a one-student-to-one-adult (teacher or trained para-educator) setting.

- **Test Administrators should determine the level of student interaction with the technology. This decision should be based on the needs and abilities of the individual student.**

- Test Administrators may choose the order in which tools, buttons, and options are shown to students. However, all the buttons, tools, and options should be shown and explained to students prior to the actual test.

- Test Administrators may stop and then return to the training based upon the individual student needs and can repeat items to show and explain tools, buttons, and options multiple times.

- A script is provided as a guide to use during the training, but Test Administrators may use different wording. However, when reading the questions, Test Administrators should read the exact wording in the script to simulate the actual test.

- Test Administrators should read aloud **word for word** the text that is printed in **bold type**. The text that is italicized is information for the Administrator, and it should not be read to the student.

- The student’s primary mode of communication is always recognized and accommodated. Training and response methods may be adapted to meet individual student needs.

- The training process may be concluded when the student has had the opportunity to learn and practice using the tools, buttons, and options that will be available during the test. Test Administrators may decide to stop and discontinue the training based on the individual student needs.

- Test Administrators can use the Online Tools Training Student Booklet for a corresponding grade-band as a resource if they believe it will help the student to understand and practice using the tools. Since the training is not scored, Test Administrators do not need to record answers if the student uses the paper-based questions. In actual test conditions, if the student answers the questions using the print-on-demand paper test, Test Administrators will need to record the answers and enter them online for the student to receive a score. Instructions on this process will be provided in the Nebraska Student-Centered Assessment System (NSCAS) Alternate Assessment Administration Manual for each year’s operational test.
Online Functionality

The student will only use certain buttons, tools, and options during the test. However, it is essential that Test Administrators are aware of and understand the functionality of all tools, buttons, and options that will be available during the training and the test.

Test Administrators can access the OTT before administering the training to learn about the main buttons and tools that they will be helping the student to learn and use.

- Sign in to the Online Tools Training (which is the same process as signing in a student), and navigate through the screens until the first question.

- Select the Help button (❓) in the upper-right corner of the screen.

  Across the top of the Help window, there are tabs for different areas of information within Help. Once an area is chosen, the left pane will list the topics available for that area. Once a topic is chosen, the content for that topic will be shown in the right pane of the Help window.

  The Help library for some of the question types and tools can be accessed by choosing the question mark icon (❓) that appears in the upper-right corner of the question type or tool. When this icon is chosen, the Help information for that question type or tool will be shown.

  To close Help, choose the red close button (❌) in the upper-right corner of the Help window.

- To quickly find help for certain features, access the What’s This? feature.

  To access What’s This?, choose the Help button (❓) and then choose What’s This? from the menu. Choose any object that has a question mark (❓) to show Help for that object. To close Help, choose the red close button (❌) in the upper-right corner of the Help window.

Troubleshooting

If you see an error message during training, please contact your local IT staff as soon as a problem occurs or as soon as possible following the training. They can contact Nebraska Customer Service at (866) 342-6280 or at necustomerservice@datarecognitioncorp.com if they need additional help to resolve the issue.

Common Troubleshooting Tips:

1. Exit INSIGHT and re-launch the software.
2. Restart the computer and re-launch INSIGHT.
3. Move to a different computer.
4. Note the computer or touchscreen device experiencing the issue. Technical staff may need to access the specific computer or touchscreen device to investigate and resolve the issue.

Additional Questions

If you have any additional questions not covered in this Nebraska Student-Centered Assessment System (NSCAS) Alternate Assessment Online Tools Training Administration Manual, please contact DRC Customer Service at 1-866-342-6280 or email necustomerservice@datarecognitioncorp.com.
DRC representatives will always try to answer your questions when you call. If they are not able to answer your questions immediately, they will return your call within 24 hours. The representatives will log each call and record the nature of the question or problem reported, whether a resolution has been made, and whether a return call is needed. Representatives are available from 8:00 a.m. to 5:00 p.m. Central Time (7:00 a.m. to 4:00 p.m. Mountain Time), Monday through Friday. Customer Service hours expand to 7:00 a.m. to 5:00 p.m. Central Time (6:00 a.m. to 4:00 p.m. Mountain Time) one week before and after the testing window.
Part II. Administering the Online Tools Training

The OTT process is the same for all content areas, with eight content-specific and grade-band-focused questions for the student to practice using the tools. All content areas have the same tools, buttons, and options in the OTT.

NOTE: The INSIGHT client must be installed on the computer or touchscreen device to be used during the training prior to administering the training.

SAY: Today, you will be learning and practicing the use of online tools that will be available when you take the actual test. We will use questions to practice.

First, I will sign you in to do the training.

Signing In

Test Administrators will sign in the student to access the OTT by completing the following process.

- Select the DRC INSIGHT icon on the screen.

- Select the Online Tools Training link.
A screen with links to the OTT for each content area will appear.

- Select the appropriate content area. In this example, the link to English Language Arts is used.

A screen with links to different grade-bands for that content will appear.

- Select the appropriate grade-band. In this example, the link to grades 6 to 8 is used.
• Enter the generic Username and Password that appear on the screen.
• Select the **Sign In** button to submit the Username and Password.

![Sign in with the following Username and Password.](image)

• Verify all the student information that appears on the Student Verification page. In this training, the generic name **Training Student** will appear, with information about the OTT. The Test Name will display the selected content area. (The example below displays a number.)

• Select the **Continue** button.

![Welcome Training Student.](image)
• Select the link to the test that has been scheduled for the student. In this example, the link to the OTT for English Language Arts will appear.

The following tests have been scheduled for Training Student!

Once instructed, click on the test link below to start the test.

If no additional tests are available, please select Exit to close the application.

• **English Language Arts**

This completes the access to the Online Tools Training. This process is the same to access each of the links to the OTT for a specific content area.
Training

English Language Arts

Once in the OTT, Test Administrators will read the content displayed on the screen and explain and show the functionality of tools, buttons, and options.

Test Administrators will determine the level of student interaction with the technology based on the needs and abilities of each student.

SAY: You are now signed in to the training.

Read the directions that appear on the first screen.

NOTE: The content area that corresponds to the training is indicated by the title. However, the directions are the same for all content areas.

Remember that you can assist the student as needed in selecting and using the tools, buttons, and options.

SAY: This screen contains general directions to complete the training for English Language Arts. Follow along as I read the directions.

Directions – English Language Arts

There are eight practice questions. You will need to follow along as the questions are read to you.

Each question has a practice hint. The practice hint tells you which tool to use in that question.

After you have answered all eight questions, the online tools training is complete.

Select the Begin the Test button when you are ready to begin the training.

Pause.

SAY: Do you have any questions?

Answer the questions. Continue after the Begin the Test button is selected.

SAY: Now, follow along as I read the questions.

Remember that you must read the text in bold exactly as it appears in the script to mimic testing conditions as closely as possible.

First, read the Practice Hint exactly as it appears in the script. Use your knowledge of the individual student needs to determine whether to interrupt the training and explain and/or demonstrate the functionality of the tool/button, or to allow the student to work independently. Then, read the question and answer choices.

Repeat this process until the student has completed the practice for all four questions.

The following pages contain the questions corresponding to English Language Arts for grades 6 to 8.
Prepare

- Place student test page in front of the student.
- Call student's attention to the page.

SAY

(Practice Hint: Use the Line Guide tool to help you keep track of each line in a story.)

Follow along as I read this paragraph. Indicate.

Plants need several things to grow. They need sunlight. They need good soil and the right amount of water. Plants will live a long time if they get good care.

ASK

What is the main idea of this paragraph?

Indicate and read answers.

A. Plants grow best in pots.
B. Plants can grow from seeds.
C. Plants need proper care to grow.

Question 1

Plants need several things to grow. They need sunlight. They need good soil and the right amount of water. Plants will live a long time if they get good care.

- Plants grow best in pots.
- Plants can grow from seeds.
- Plants need proper care to grow.

- Repeat the Sign In process.
- Select the OTT link corresponding to Science.

Once in the OTT, Test Administrators will read the content displayed on the screen and explain and show the functionality of tools, buttons, and options.

**Test Administrators will determine the level of student interaction with the technology based on the needs and abilities of each student.**

**SAY:** You are now signed in to the training.

*Read the directions that appear on the first screen.*

**NOTE:** The content area that corresponds to the training is indicated by the title. However, the directions are the same for all content areas.

*Remember that you can assist the student as needed in selecting and using the tools, buttons, and options.*

**SAY:** This screen contains general directions to complete the training for Science. Follow along as I read the directions.

**Directions – Science**

There are eight practice questions. You will need to follow along as the questions are read to you.

Each question has a practice hint. The practice hint tells you which tool to use in that question.

After you have answered all eight questions, the online tools training is complete.

Select the Begin the Test button when you are ready to begin the training.

Pause.

**SAY:** Do you have any questions?

*Answer the questions. Continue after the Begin the Test button is selected.*

**SAY:** Now, follow along as I read the questions.

*Remember that you must read the text in bold exactly as it appears in the script to mimic testing conditions as closely as possible.*

*First, read the Practice Hint exactly as it appears in the script. Use your knowledge of the individual student needs to determine whether to interrupt the training and explain and/or demonstrate the functionality of the tool/button, or to allow the student to work independently. Then, read the question and answer choices.*

*Repeat this process until the student has completed the practice for all questions.*

The following pages contain the eight questions corresponding to Science for grade 8.
Prepare

- Place student test page in front of the student.
- Call student’s attention to the page.

SAY

(Practice Hint: Use the Magnifier tool to increase the size of words and pictures.)
Here is a picture of the layers of Earth. Indicate.

ASK

Which layer is the arrow pointing to?
Indicate and read answers.
A. core
B. crust
C. mantle
