

College Ready

THE POWER OF LANGUAGES

to make you college,
career, and civic ready

**WORLD LANGUAGE WEEK
MARCH 31-APRIL 6, 2019**

Brain research has shown that language study is linked to improvement in memory, planning, reasoning, and problem solving.

More research showed that bilinguals have excelled in multitasking. Speaking multiple languages forces the brain to function at two tasks simultaneously.

Studying a second language forces us to better understand and use our first language. This would be very helpful for all of those college essays!
